

What Do You Do if You See a Stranded Otter?

OTTER Protocol

O: Observe from a Distance

T: Take Notes

T: Take Pictures

E: Exact Location

R: Report to SeaLife Center

Alaska SeaLife Center 24/7
Stranding Hotline
(888) 774 - 7325

THE SEA OTTER

Sea otters are a common sighting in the Kachemak Bay area. Although they have a large population, otters are susceptible to many threats such as disease and boat-strike. Beached otters provide valuable data that helps us better understand what is going on in the population and environment as a whole. Use the **OTTER** protocol to report any findings!
